

The Powder Meister® requires simple, but regular, maintenance.

-

Symptoms of a Clogged Nozzle

Depending on the degree of obstruction of the nozzle entrance hole, symptoms can manifest in any of the following three ways:

- A reduction of powder flow
- A sudden burst of powder followed by a reduced flow
- A complete stoppage of powder flow.

Please do not remove any internal tags meant for the doctor for any part of the Powder Meister®. Please make sure that the doctor receives the instructional CD along with the Quick-Start and tube eshoot-] T J 0 -1.1485
